1. The following is an examiner's statement of reasons for allowance: Applicants show a tablet suitable for chewing and process for preparing said tablet such that the tablet disintegrates at a desired rate while still having optimum properties of friability and hardness. The prior art shows fast disintegrating tablets wherein excipients such as dextrose monohydrate and crospovidone are utilized. Dobetti US 6,596,311 B1 shows a fast disintegrating tablet that may comprise crospovidone, however dextrose monohydrate is not disclosed. The prior art does not show applicants' particular tablet comprised of an active ingredient, dextrose monohydrate and crospovidone wherein the tablet is processed so that the final tablet comprises a partially hydrated hydrate. The water while not actually lost during the process is redistributed to enable softening of the tablet and optimization of properties required for said tablet.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claims 19, 20 and 24-35 are allowed.

Claims 1-18 and 21-23 have been canceled.
